

A APPLICATION FOR STUDENTS ATTENDENCE SYSTEM

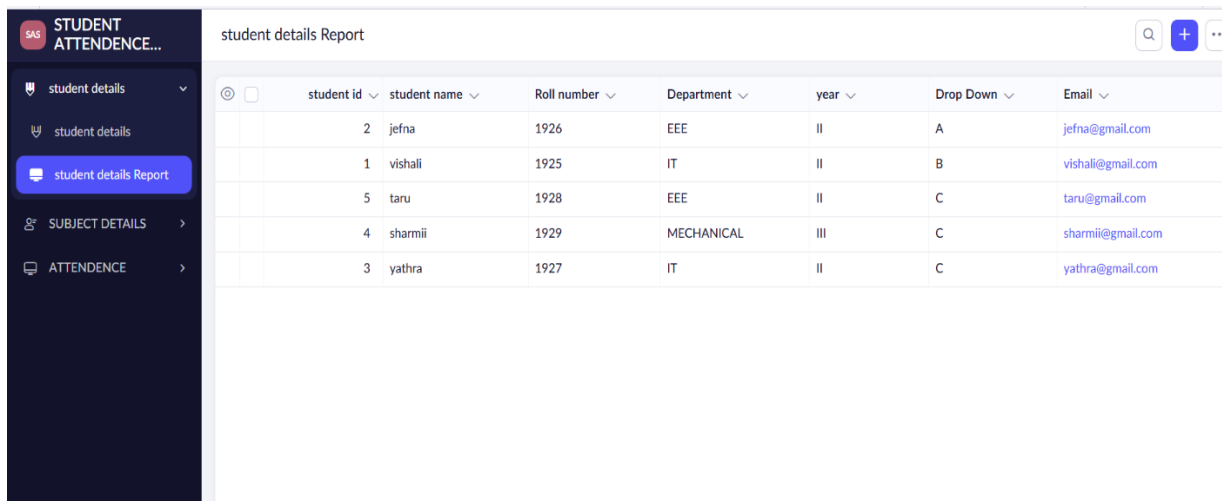

Aim:

To create a simple cloud-based Student Attendance System using a cloud service provider to demonstrate the Software as a Service (SaaS) model.

Procedure:

1. Log in to the cloud platform (e.g., Zoho Creator).
2. Create a new application named **Student Attendance System**.
3. Design a form to store student details such as student ID, name, department, year, and section.
4. Create an attendance form with fields for date, subject, student name, and attendance status (Present/Absent).
5. Generate reports to view daily, weekly, and monthly attendance records.
6. Save and deploy the application on the cloud platform.
7. Test the application by adding sample student records and marking attendance.
8. Verify that the attendance data is stored securely and can be accessed online.

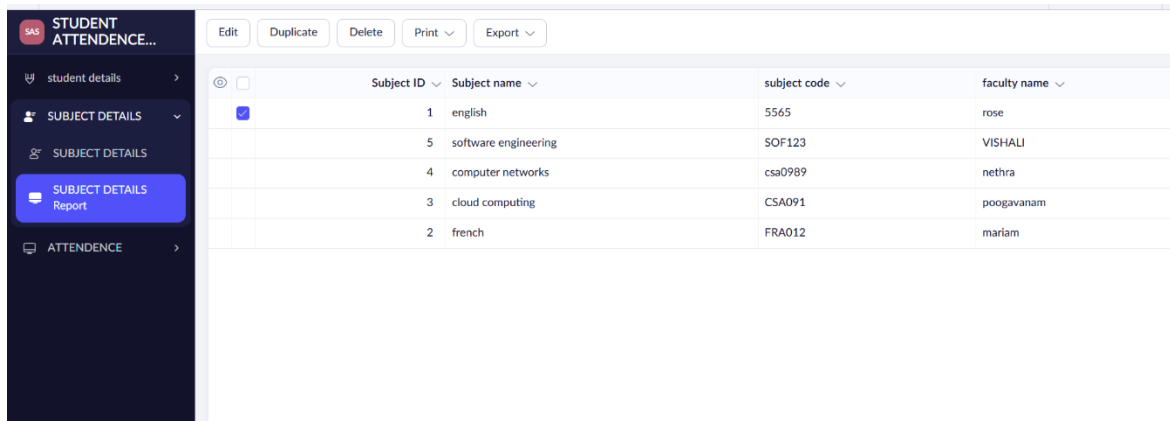

24.1 STUDENT DETAILS

The screenshot displays the 'STUDENT ATTENDANCE...' application interface. On the left is a dark sidebar with navigation links: 'student details' (selected), 'student details Report', 'SUBJECT DETAILS', and 'ATTENDANCE'. The main area shows a table titled 'student details Report' with the following data:

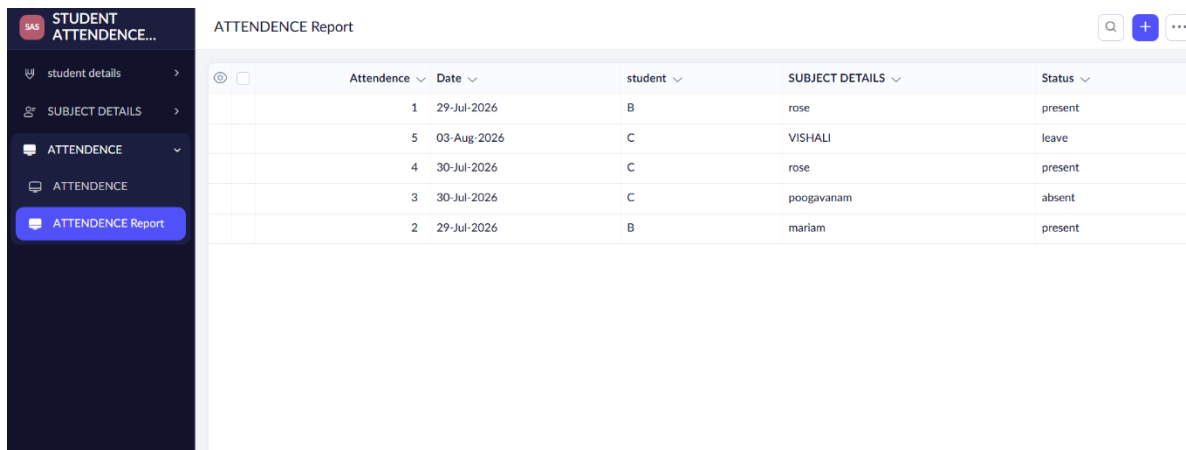

student id	student name	Roll number	Department	year	Drop Down	Email
2	jefna	1926	EEE	II	A	jefna@gmail.com
1	vishali	1925	IT	II	B	vishali@gmail.com
5	taru	1928	EEE	II	C	taru@gmail.com
4	sharmii	1929	MECHANICAL	III	C	sharmii@gmail.com
3	yathra	1927	IT	II	C	yathra@gmail.com

24.2 SUBJECT DETAILS

Subject ID	Subject name	subject code	faculty name
1	english	5565	rose
5	software engineering	SOF123	VISHALI
4	computer networks	csa0989	nethra
3	cloud computing	CSA091	poogavanam
2	french	FRA012	mariam

24.3 ATTENDENCE DETAILS

Attendance	Date	student	SUBJECT DETAILS	Status
1	29-Jul-2026	B	rose	present
5	03-Aug-2026	C	VISHALI	leave
4	30-Jul-2026	C	rose	present
3	30-Jul-2026	C	poogavanam	absent
2	29-Jul-2026	B	mariam	present

Result:

A cloud-based Student Attendance System was successfully created and deployed. The application allows users to manage student information and attendance records online, demonstrating the Software as a Service (SaaS) model in cloud computing.
