

A SIMPLE CLOUD SOFTWARE APPLICATION FOR PROPERTY BUYING & RENTAL PROCESS

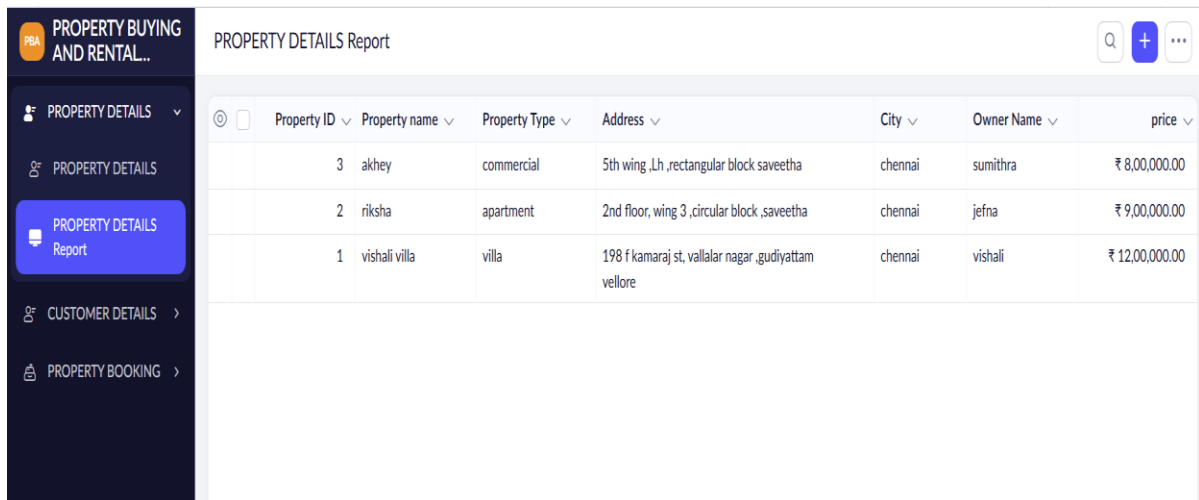

AIM:

To create a simple cloud-based Property Buying and Rental application using a cloud service provider to demonstrate the Software as a Service (SaaS) model.

PROCEDURE:

1. Log in to the cloud platform (e.g., Zoho Creator).
2. Create a new application named **Property Buying & Rental**.
3. Design a form to store property details such as property name, location, type, price/rent, owner name, and contact number.
4. Create another form to store customer details such as name, phone number, email, and property preference.
5. Add fields to record property booking or rental requests.
6. Configure reports to display available properties and customer requests.
7. Save the application and deploy it on the cloud.
8. Test the application by adding sample property and customer records and verify that the data is stored and accessed through the cloud.

3.1 PROPERTY DETAILS

The screenshot displays the Zoho Creator application interface. On the left is a dark sidebar with the application name 'PROPERTY BUYING AND RENTAL...' and a menu with options: 'PROPERTY DETAILS' (selected), 'PROPERTY DETAILS Report', 'CUSTOMER DETAILS', and 'PROPERTY BOOKING'. The main area shows a 'PROPERTY DETAILS Report' table with the following data:
