

A SIMPLE APPLICATION FOR CAR BOOKING RESERVATION SYSTEM

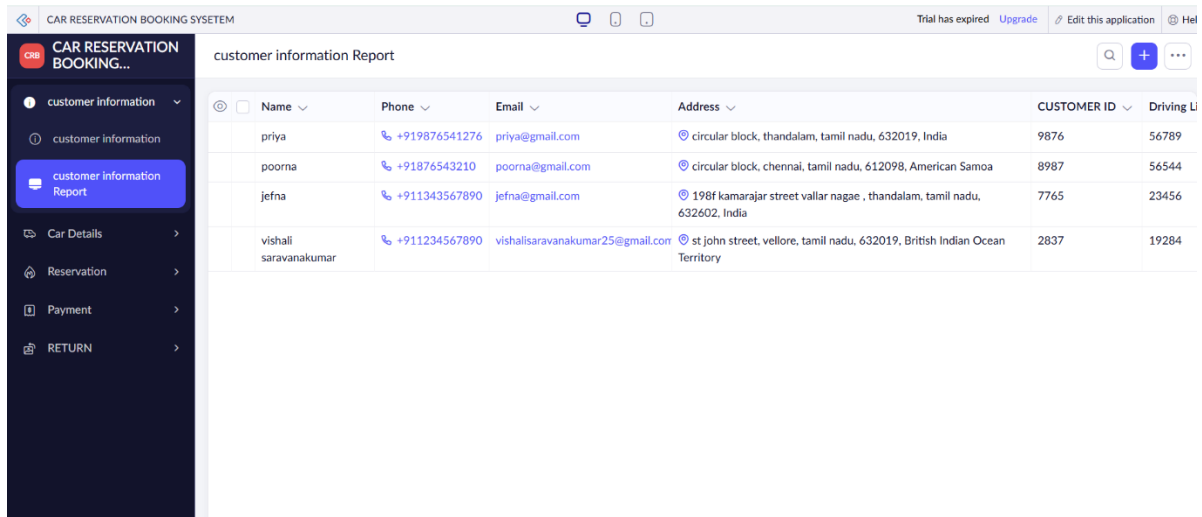

Aim:

To create a simple cloud-based Car Booking Reservation System using a cloud service provider to demonstrate the Software as a Service (SaaS) model.

Procedure:

1. Log in to the cloud platform (e.g., Zoho Creator).
2. Create a new application named **Car Booking Reservation System**.
3. Design a form to store car details such as car model, registration number, type, seating capacity, rental price, and availability.
4. Create a customer registration form with details such as name, phone number, email, and address.
5. Create a booking form to record booking date, return date, selected car, and customer details.
6. Generate reports to display available cars, booked cars, and customer bookings.
7. Save and deploy the application on the cloud platform.
8. Test the application by entering sample car and booking details and verify that the information is stored and accessed online.

4.1 CUSTOMER INFORMATION

The screenshot displays the Zoho Creator application interface for 'CAR RESERVATION BOOKING SYSETEM'. The left sidebar contains a menu with options: 'customer information', 'customer information Report', 'Car Details', 'Reservation', 'Payment', and 'RETURN'. The main area shows a table titled 'customer information Report' with the following data:
