

A APPLICATION FOR LIBRARY BOOK RESERVATION SYSTEM FOR SIMATS LIBRARY

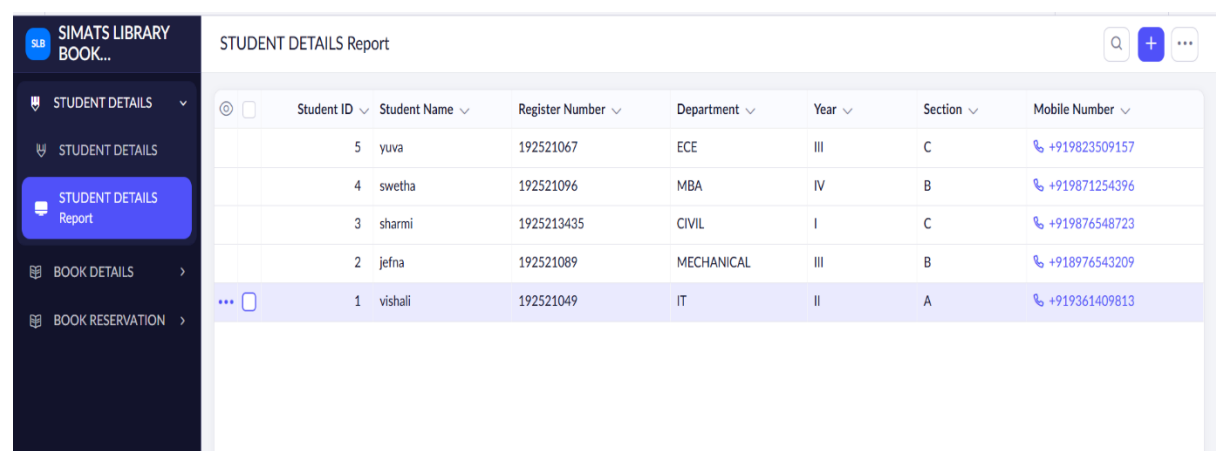

Aim:

To create a simple cloud-based Library Book Reservation System for the SIMATS Library using a cloud service provider to demonstrate the Software as a Service (SaaS) model.

Procedure:

1. Log in to the cloud platform (e.g., Zoho Creator).
2. Create a new application named **SIMATS Library Book Reservation System**.
3. Design a form to store book details such as Book ID, Title, Author, Category, Availability, and Shelf Number.
4. Create a student registration form with details such as Student ID, Name, Department, Year, and Contact Number.
5. Create a reservation form to allow students to reserve available books by selecting the book and reservation date.
6. Generate reports to display available books, reserved books, and reservation history.
7. Save and deploy the application on the cloud platform.
8. Test the application by adding sample books, student records, and reservation details to verify that the data is stored and accessed online.

5.1 STUDENT DETAILS

Student ID	Student Name	Register Number	Department	Year	Section	Mobile Number
5	yuva	192521067	ECE	III	C	+919823509157
4	swetha	192521096	MBA	IV	B	+919871254396
3	sharmi	1925213435	CIVIL	I	C	+919876548723
2	jefna	192521089	MECHANICAL	III	B	+918976543209
1	vishali	192521049	IT	II	A	+919361409813

5.2 BOOK DETAILS

Book ID	Book Title	Book Author	Book Category	ISBN	Rack number	Available copies
3	maths	ramanujar	mathematics	1236	3	100
2	mary the queen	summer	literature	1235	10	10
1	wing of fire	abdul kalam	literature	1234	76	90

5.3 BOOK RESERVATION

Reservation ID	STUDENT NAME	BOOK TITLE	Reservation Date	Issue Date	Return Date	Reservation Status
3	jefna	wing of fire	31-Jul-2026	03-Aug-2026	05-Aug-2026	returned
2	yuva	mary the queen	01-Aug-2026	03-Aug-2026	07-Aug-2026	returned
1	swetha	maths	30-Jul-2026	31-Jul-2026	01-Aug-2026	reserved

Result:

A cloud-based Library Book Reservation System for the SIMATS Library was successfully created and deployed. The application enables students to reserve books online and allows library staff to manage book availability and reservation records efficiently, demonstrating the Software as a Service (SaaS) model in cloud computing.
